

## **Nuclear medicine stress testing**

<https://pclc.heartuniversity.org/content/course/1450/lesson/1475>

Joseph MacLean, Tony Giordano

Stress echocardiography can be done by using physical exercise or pharmacologic agents as the stressor. There are benefits and limitations to each strategy. Nuclear medicine stress testing can provide functional data while also helping specify region-specific assessment of function and ischemia. This module reviews nuclear medicine stress testing.
