

## **Image Fusion (Echo/CT/MR with angiography)**

Stephan Schubert

<https://pclc.heartuniversity.org/content/course/991/lesson/1016>

With a number of different imaging modalities available in pediatric cardiology, understanding the complementary nature of all the modalities is necessary. This allows for appropriate and efficient selection of the best modality to answer specific clinical questions. Understanding the synergy of various modalities is increasingly important. This module reviews image fusion.
