

# **Intensivist ultrasound: does it truly have potential as a hemodynamic monitor?**

Eric Su

<https://pclc.heartuniversity.org/content/course/1215/lesson/1240>

Clinical monitoring in the cardiac intensive care unit can be challenging. All monitoring strategies have their limitations. Bedside ultrasound, including echocardiography, can provide complementary, real-time data to the cardiac intensivist to help titrate therapies. This module reviews intensivist ultrasound.
